نامه دوم رهبری برای جوانان غربی

زبان انگلیسی

#CommonWorry

A BETTER TOMORROW

The issue, however, is that if today's pain is not used to build a better and safer future, then it will just turn into bitter and fruitless memories.

#CommonWorry

BUILDING THE FUTURE

I genuinely believe that it is only you the youth who by learning the lessons of today's hardship, have the power to discover new means for building the future and who can be barriers in the misguided path that has brought the west to its current impasse.

#CommonWorry

COMMON WORRY

It is correct that today terrorism is our common worry. However, it is necessary for you to know that the insecurity and strain that you experienced during the recent events, differ from the pain that the people of Iraq, Yemen, Syria and Afghanistan have been experiencing for many years, in two significant ways. First, the Islamic world has been the victim of terror and brutality to a larger extent territorially, to greater amount quantitatively and for a longer period in terms of time.

#CommonWorry

VIOLENCE SUPPORT

It is correct that today terrorism is our common worry. However, it is necessary for you to know that the insecurity and strain that you experienced during the recent events, differ from the pain that the people of Iraq, Yemen, Syria and Afghanistan have been experiencing for many years, in two significant ways... Second, that unfortunately this violence has been supported by certain great powers through various methods and effective means.

#CommonWorry

THE ROLE OF U.S.A.

Today, there are very few people who are uninformed about the role of the United States of America in creating, nurturing and arming al-Qaeda, the Taliban and their inauspicious successors.

#CommonWorry

BACKWARD SYSTEMS

Besides this direct support, the overt and well-known supporters of takfiri terrorism- despite having the most backward political systems- are standing arrayed as allies of the west while the most pioneering, brightest and most dynamic democrats in the region are suppressed mercilessly.

#CommonWorry

POLITICAL CONTRADICTION

The prejudiced response of the west to the awakening movement in the Islamic world is an illustrative example of the contradictory western policies.

#CommonWorry

STATE TERRORISM

The other side of these contradictory policies is seen in supporting the state terrorism of Israel. The oppressed people of Palestine have experienced the worst kind of terrorism for the last sixty years.

#CommonWorry

DEATH MACHINERY

If the people of Europe have now taken refuge in their homes for a few days and refrain from being present in busy places- it is decades that a Palestinian family is not secure even in its own home from the Zionist regime's death and destruction machinery.

#CommonWorry

SETTLEMENT CONSTRUCTIONS

What kind of atrocious violence today is comparable to that of the settlement constructions of the Zionist regime?

This regime- without ever being seriously and significantly censured by its influential allies or even by the so-called independent international organizations- everyday demolishes the homes of Palestinians and destroys their orchards and farms.

#CommonWorry

LONG-TERM VIOLENCE

This is done without even giving them time to gather their belongings or agricultural products and usually it is done in front of the terrified and tear-filled eyes of women and children who witness the brutal beatings of their family members who in some cases are being dragged away to gruesome torture chambers. In today's world, do we know of any other violence on this scale and scope and for such an extended period of time?

#CommonWorry

BARBARISM

Shooting down a woman in the middle of the street for the crime of protesting against a soldier who is armed to the teeth- if this is not terrorism, what is? This barbarism, because it is being done by the armed forces of an occupying government, should not be called extremism? Or maybe only because these scenes have been seen repeatedly on television screens for sixty years, they should no longer stir our consciences.

#CommonWorry

CONTRADICTION LOGIC

The military invasions of the Islamic world in recent years- with countless victims- are another example of the contradictory logic of the west.

#CommonWorry

ECONOMICAL DESTRUCTION

The assaulted countries, in addition to the human damage caused, have lost their economic and industrial infrastructure, their movement towards growth and development has been stopped or delayed and in some cases, has been thrown back decades. Despite all this, they are rudely being asked not to see themselves as oppressed.

#CommonWorry

ENTICEMENTS

How can a country be turned into ruins, have its cities and towns covered in dust and then be told that it should please not view itself as oppressed?

Instead of enticements to not understand and to not mention disasters, would not an honest apology be better?

#CommonWorry

HYPOCRISY

The pain that the Islamic world has suffered in these years from the hypocrisy and duplicity of the invaders is not less than the pain from the material damage.

#CommonWorry

GOOD AND BAD TERRORISM

In my opinion, the first step in creating security and peace is reforming this violence-breeding mentality.

As long as double-standards dominate western policies, as long as terrorism- in the view of its powerful supporters- is divided into "good" and "bad" types.

#CommonWorry

PRECEDENCE OF INTERESTS

And as long as governmental interests are given precedence over human values and ethics, the roots of violence should not be searched for in other places.

#CommonWorry

SILENT INVASION

Unfortunately, these roots have taken hold in the depths of western cultural policies over the course of many years and they have caused a soft and silent invasion.

#CommonWorry

CLONING OF CULTURE

Many countries of the world take pride in their local and national cultures, cultures which through development and regeneration have soundly nurtured human societies for centuries. The Islamic world is not an exception to this. However in the current era, the western world with the use of advanced tools is insisting on the cloning and replication of its culture on a global scale.

#CommonWorry

SILENT VIOLENCE

I consider the imposition of western culture upon other peoples and the trivialization of independent cultures as a form of silent violence and extreme harmfulness.

Humiliating rich cultures and insulting the most honored parts of these, is occurring while the alternative culture being offered in no way has any qualification for being a replacement.

#CommonWorry

CULTURAL DEGRADATION

For example, the two elements of "aggression" and "moral promiscuity" which unfortunately have become the main elements of western culture, have even degraded the position and acceptability of its source region.

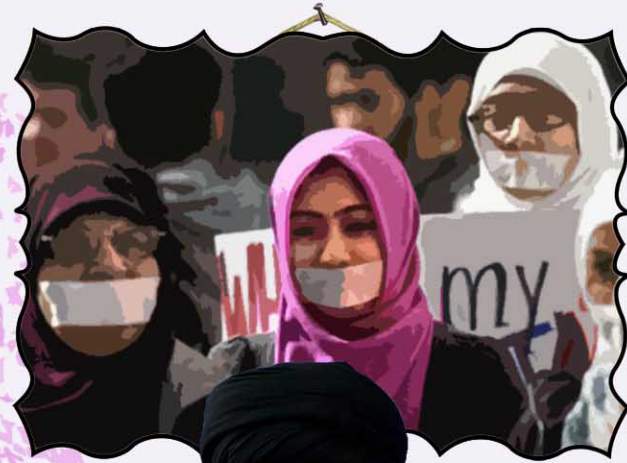

#CommonWorry

THE FLOOD OF IMPROPRIETY

So now the question is: are we "sinners" for not wanting an aggressive, vulgar and fatuous culture? Are we to be blamed for blocking the flood of impropriety that is directed towards our youth in the shape of various forms of quasi-art?

#CommonWorry

CULTURAL INTERACTION

I do not deny the importance and value of cultural interaction. Whenever these interactions are conducted in natural circumstances and with respect for the receiving culture, they result in growth, development and richness. On the contrary, inharmonious interactions have been unsuccessful and harmful impositions.

#CommonWorry

ILL-FATED PAIRING

We have to state with full regret that vile groups such as DAESH are the spawn of such ill-fated pairings with imported cultures.

If the matter was simply theological, we would have had to witness such phenomena before the colonialist era, yet history shows the contrary.

#CommonWorry

A GARBAGE AS DAESH

Authoritative historical records clearly show how colonialist confluence of extremist and rejected thoughts in the heart of a Bedouin tribe, planted the seed of extremism in this region. How then is it possible that such garbage as DAESH comes out of one of the most ethical and humane religious schools which as part of its inner core, includes the notion that taking the life of one human being is equivalent to killing the whole of humanity?

#CommonWorry

EUROPEAN EXTREMISTS

One has to ask why people who are born in Europe and who have been intellectually and mentally nurtured in that environment are attracted to such groups? Can we really believe that people with only one or two trips to war zones, suddenly become so extreme that they can riddle the bodies of their compatriots with bullets?

#CommonWorry

CORRUPT ENVIRONMENT

On this matter, we certainly cannot forget about the effects of a life nurtured in a pathologic culture in a corrupt environment borne out of violence. On this matter, we need complete analyses, analyses that see the hidden and apparent corruptions.

#CommonWorry

PREJUDICE

Maybe a deep hate- planted in the years of economic and industrial growth and borne out of inequality and possibly legal and structural prejudice- created ideas that every few years appear in a sickening manner.

#CommonWorry

SEALING THE FISSURES

In any case, you are the ones that have to uncover the apparent layers of your own society and untie and disentangle the knots and resentments. Fissures have to be sealed, not deepened.

#CommonWorry

HASTY REACTIONS

Hasty reactions are a major mistake when fighting terrorism which only widens the chasms. Any rushed and emotional reaction which would isolate, intimidate and create more anxiety for the Muslim communities living in Europe and America- which are comprised of millions of active and responsible human beings- and which would deprive them of their basic rights more than has already happened and which would drive them away from society- not only will not solve the problem but will increase the chasms and resentments.

#CommonWorry

SUPERRFICIAL MEASURES

Superficial measures and reactions, especially if they take legal forms, will do nothing but increase the current polarizations, open the way for future crises and will result in nothing else.

#CommonWorry

SPYING ON MUSLIMS

According to reports received, some countries in Europe have issued guidelines encouraging citizens to spy on Muslims. This behavior is unjust and we all know that pursuing injustice has the characteristic of unwanted reversibility.

#CommonWorry

EXPERIENCE OF KINDNESS

Besides, the Muslims do not deserve such ill-treatment. For centuries, the western world has known Muslims well- the day that westerners were guests in Islamic lands and were attracted to the riches of their hosts and on another day when they were hosts and benefitted from the efforts and thoughts of Muslims- they generally experienced nothing but kindness and forbearance.

#CommonWorry

BLAZE OF HOPE

Therefore I want you the youth to lay the foundations for a correct and honorable interaction with the Islamic world based on correct understanding, deep insight and lessons learned from horrible experiences. In such a case and in the not too distant future, you will witness the edifice built on these firm foundations which creates a shade of confidence and trust which cools the crown of its architect, a warmth of security and peace that it bequests on them and a blaze of hope in a bright future which illuminates the canvass of the earth.

#CommonWorry

MULTIPLE DAMAGES

The bitter events brought about by blind terrorism in France have once again, moved me to speak to you young people. For me, it is unfortunate that such incidents would have to create the framework for a conversation, however the truth is that if painful matters do not create the grounds for finding solutions and mutual consultation, then the damage caused will be multiplied.

#CommonWorry

THE PAIN OF OUR FELLOWS

The pain of any human being
anywhere in the world causes
sorrow for a fellow human being.
The sight of a child losing his life
in the presence of his loved ones...

#CommonWorry

MOURNFUL MOTHER

The pain of any human being
anywhere in the world causes
sorrow for a fellow human being...
A mother whose joy for her family
turns into mourning...

#CommonWorry

THE LIFELESS BODY

The pain of any human being anywhere in the world causes sorrow for a fellow human being...

A husband who is rushing the lifeless body of his spouse to some place...

#CommonWorry

THE FINAL SCENE

The pain of any human being
anywhere in the world causes
sorrow for a fellow human being...

And the spectator who does not
know whether he will be seeing
the final scene of life- these are
scenes that rouse the emotions and
feelings of any human being.

#CommonWorry

LOVE AND HUMANITY

Anyone who has benefited from affection and humanity is affected and disturbed by witnessing these scenes- whether it occurs in France or in Palestine or Iraq or Lebanon or Syria.

#CommonWorry

ABHOR AND REVOLT

Without a doubt, the one-and-a-half billion Muslims also have these feelings and abhor and are revolted by the perpetrators and those responsible for these calamities.
